Plus it shows exactly how to integrate all four elements to deliver maximum value. "Web-Based Infrastructures: A 4D Framework" outlines both the unique and "classic" issues that surround Web-based IT initiatives, then presents critical process solutions that transcend technology to cover every dimension of the business. In addition, it defines a solid and powerful 4D framework that will support virtually any project or initiative. Its features include: Leveraging IT best practices to define and deliver Web-centered businesses and business processes; A phased, disciplined project management approach to creating value; New value chain methodologies, analysis, and redesign techniques for the Web-centered enterprise; High-velocity implementation solutions built upon the reality of constant change. "Web-Based Infrastructures: A 4D Framework" will dramatically improve the way IT professionals and managers work together to design, implement, and manage technology infrastructure, and how they use that...
