paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 185 Publisher: Beijing Jiaotong University Pub. Date :2010-07-01 version 1. This book is the work of the organization of teaching process and project content. project mainly includes analog electronics technology involved in the basics and focus on The knowledge point simulation. simulation results. For the simulation. each project arrangement skills training and integrated training two modules. Book a total of four projects: the small-signal amplifier. signal operations and processing circuits. power amplifier design and production. the DC power supply design and production. each project contains several sub-modules of the system to achieve exposition of knowledge. clear and detailed. To apply for the purpose of the book. highlighting the combination of theory and practical training to strengthen the basic concepts of narrative. the content of classroom lectures. discussion questions thinking. skills training. extra-curricular learning content. exercises and other self-test questions and the optimal combination will help inspire and guide students ability to think independently. to stimulate the enthusiasm of students. Book as a vocational college electronics. automation. electronics. information technology classes and other professional analog electronic course materials. but also work as a technician in electronics reference books. Contents: Project 1 small signal amplifier 1.1 diode module performance testing and application 1.1.1 diode one-way conductive characteristics of the test 1.1.2 test 1.1.3 LED diode performance characteristics of an integrated low-power transistor test module 1.2 Performance test 1.2 .1 the basic characteristics of the test 1.2.2 transistor transistor characteristic curve of the test 1.2.3 Detection and characterization of low-power transistor module 1.3 amplifier circuit testing and application of the basic transistor amplifier 1.3.1 DC and AC working condition of the test 1.3 .2 amplifier performance tests 1.3.3 common...
